

Depths are approximate and were taken from shoreline with an anchor, line, and markings on rope at 1-meter intervals. Depth readings were taken at a higher tide that was +/- 1 meter higher than low tide, so readings were reduced by 1 meter in order to get readings for a typical low tide depth.

- ① Main Delap Dock (3.5.2)
- ② Dock Apron (3.5.2.3)
- ③ Delap East Dock (3.5.3)
- ④ Delap West Dock (3.5.4)
- ⑤ Cargo Handling and Container Storage Area (3.5.5)
- ⑥ RMI Ports Authority Office Building (3.5.6.1)
