

# MICRONESIAN AVIATION SAFETY AND SECURITY COMMISSION

***MAJURO AERODROME  
CERTIFICATION/ASSESSMENT***

**May 8–12, 2017**

**By: Massy Halbert**

# Project Overview

To establish a regional cooperation in aviation through intergovernmental collaboration and development

## Mission

To improve safety and security standards within the aviation sector of the Micronesian Countries

# Background

# CHALLENGES

Recognizing the strategic role of international air transport

Financial limitations and shortages of skilled personnel

Air transport operations compliance

Lack of capacity development and skill enhancement programs

# Action Plan

Adopt and streamline policy framework for safety and security regulations

Provide technical experts and resources in aviation safety and security

Establishment of a regional aviation oversight program

Cost sharing

# Benefits

Long-term  
improvement in  
quality of  
services

Provide advisory  
service to the  
aviation  
authorities

Shared regional  
capacity on a  
fee-for-service  
basis

Reducing  
duplication

Creating  
economies of  
scale

# Benefits

Harmonized  
regulatory systems

Sharing of subject  
matter expertise/  
technically-  
qualified personnel

Reducing unit  
costs of oversight

Priority responses  
to safety and  
security needs

Enhanced  
opportunity for  
skills transfer

# Beneficiaries

## Direct

- Member countries
- Air transport operators
- All users of air transport

## Indirect

- Stakeholders of the tourism industry

## National CAA's

- Inspectors

# Capacity Development

Sector to be ensured that laws, regulations, technical documentation and procedures are internationally recognized, compliant with ICAO requirements and harmonized across the region
